Overview

Smartek is a fully customisable cloud -based management tool that streamlines your compliance process. It will improve your businesses corporate governance, management, avoidance of risk and, with its simple interface, it can control and monitor all levels and types of compliances within your business. Our adaptable system works in a number of vertical markets that can change and grow with your business.

Cloud-based Technology

Online, real time data available on demand via a secure website.

On The Spot Compliance Check

Check companies, individuals, plant and equipment compliances in one platform.

Manages Multiple Sites

Smartek can manage anything from a large construction site to a confined space.

Online Booking System

Visitor management and registration option enable appointments to be made.

Employee Management

Compliances are automatically saved and once an employee is deemed competent they can be checked in real time and prior to arrival at the site. Smartek can help prepare Learning Management Systems (LMS) for you, allowing online competency-based inductions or courses for individuals.

Employee time and attendance is monitored and they are provided with an ID card that controls their entrances onto sites.

Company Management

Smartek can link subcontracting companies to principal contractors at site.

Our Pre- Qualification function allows employees and plant and equipment to be ready for immediate access to site.

Company access to the website allows you to manage your company's compliances, employees and plant and equipment.

Compliance Management

From recording all compliances defined by you, to checking access to sites and pre-qualifications, Smartek centralises all of your compliance information and needs so you can ensure total compliance across your organisation.

"Due-to-expire" alerts are tailored, electronic and automated, making it easier to manage your business and ensuring you stay on top of your administration. ensuring you stay on top of your administration.

Geo-location & Smartek App

Smartek recently launched an app with the added use of Geolocation Technology, allowing contractors to scan into remote or isolated sites.

Faster Access

Smartek users can swipe their cards or scan a QR code or barcode for access to a site.

Location Confirmation

Smartek can check the geo-location of employee logins for confirmation of presence at site.

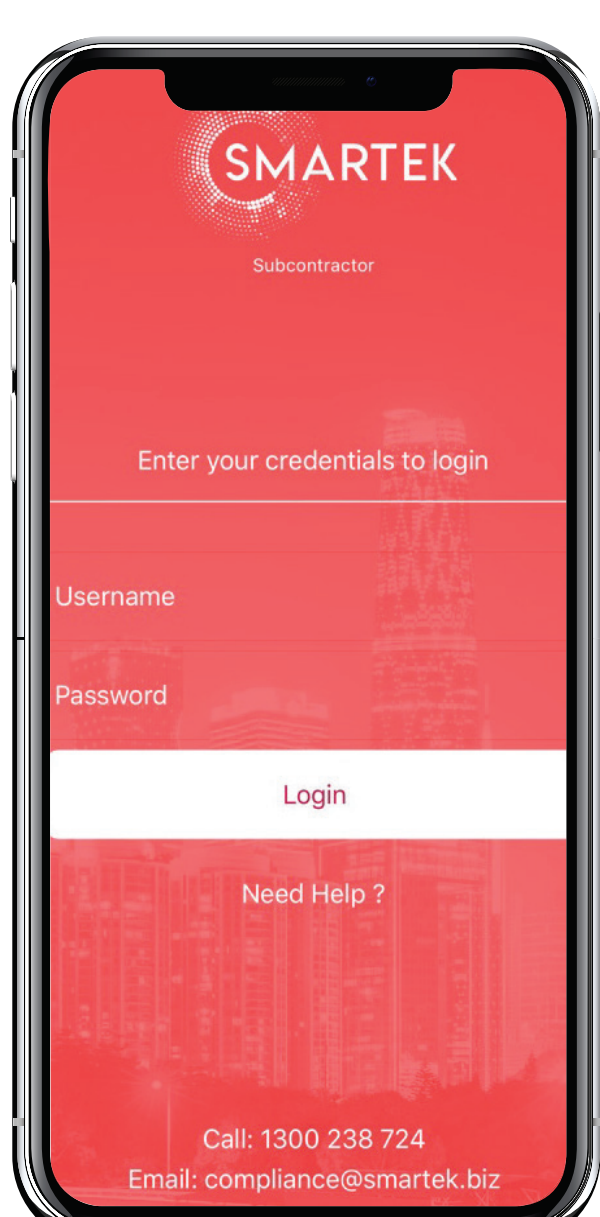

Easy to Use

The Smartek Tracker App has been designed for simple and fast use, available on Android and Apple.

Less Hassle

There is no need for an administrator to be permanently assigned to the site.
